

about us

Abide, Inc. is a specialized environmental contacting company first established in 1991. Abide provides asbestos abatement, vermiculite removal, deleading, mold remediation, PCB removal, select demolition, and bio-recovery services.

Abide is a fully licensed, insured, and bonded with the latest equipment and technology to complete projects safely, efficiently, and in compliance with all local, state, and federal regulations.

Abide has built an excellent reputation serving both public and private clients. We service several market sectors including but not limited to Health Care, Secondary Education (Colleges/Universities), K-12 Schools, Municipal and State Agencies, Industrial, Insurance, and Commercial/Residential Real Estate. Our growth and success can be attributed to the quality of our services and the satisfaction of our clients. Abide has been awarded the Super Service Award by Angie's List for the past two years in a row.

Abide is certified by the Massachusetts Supplier Diversity Office as a Woman Business Enterprise (WBE). Maria and Frank Tilli are the founders and still own and operate the business today.

Project Consultation

A critical element for project success is the time spent discussing each client's needs, understanding the working conditions of the project, and reviewing the outcome required. Abide will not give quotes over the phone without first visiting the site and performing a thorough inspection of the work area. All quotes are performed at no cost. Abide has the expertise to review all elements of a project and recommend the appropriate products, define the specific services needed, and develop a complete project plan.

Project Management

Our team of professionals at Abide include experienced Project Managers and highly trained field staff. We have managers and technicians licensed in asbestos, lead, mold abatement, hazardous waste operations, pigeon guano abatement, confined spaces, OSHA safety, Bloodborne Pathogens, bio-recovery, CPR and First Aid. In addition, Abide maintains several construction supervisors and carpenters since restoring environmentally compromised areas is commonly part of our service.

Safety First

Health and Safety is important to us and our clients. Our staff are well trained and extremely competent. We are proud of our track record with an EMR safety rating below the industry average of 1.0. Our internal protocols and procedures set us aside from the rest. Safety is part of the company culture!
